

Finding and Mapping Subdivisions

Currently we have added over 10,000 subdivisions to the map across the State of Indiana and will continue to do so as accurate information is obtained. The following explains how to search for, and map, a subdivision:

- If you cannot locate a dig site that you know is located within a subdivision, go to the map and select the **Search Tool**.

- Click on the **Points Of Interest** tab.

Location Search

Use the search parameters to locate a specific area on the map.

State/County/Place
Search Street
Search Cross Street
Points Of Interest
Lat/Lon

Search Parameters:

State: County:

Name:

Place:

Type:

Type of Place:

- Enter your search criteria by entering part of the subdivision name in the **Name** field and/or selecting “Subdivision” in the **Type** field and clicking on the “Search” button. A list of all subdivisions matching your criteria in that county will be listed.
- If you see the subdivision you are looking for, click “Show on map”.

Location Search

Use the search parameters to locate a specific area on the map.

Search Results:

Match %	State	County	Name	Type	Geom. Type	
80		Allen	Cameron Chase	Subdivision	Polygon	Show on Map
80		Allen	Chandler Landing	Subdivision	Polygon	Show on Map
80		Allen	Chapel Creek	Subdivision	Polygon	Show on Map
80		Allen	Chapmans Bridge	Subdivision	MultiPolygon	Show on Map
80		Allen	Communities Of Chadwick	Subdivision	Polygon	Show on Map
80		Allen	Covington Chase	Subdivision	Polygon	Show on Map
80		Allen	Forest Creek at Chandlers	Subdivision	Polygon	Show on Map
80		Allen	The Cove at Chandler Landing	Subdivision	MultiPolygon	Show on Map
80		Allen	The Manors at Chandler Landing	Subdivision	Polygon	Show on Map
80		Allen	The Villa at Chandler Landing	Subdivision	Polygon	Show on Map
80		Allen	Trotters Chase Section I	Subdivision	Polygon	Show on Map
80		Allen	Wallen Chase	Subdivision	Polygon	Show on Map

- The subdivision will appear on the screen highlighted in green. If you move your cursor over the subdivision, the name will appear.

- Once you have confirmed that the system has selected the correct area (look at surrounding streets, check the township, etc.), utilize the **Drawing Tools** to draw your dig site.

NOTE: If you come across an area in which there should be a subdivision on our map and there is not, and you have information on it, please contact our office.

NOTE: Whenever your dig site is located within a subdivision and we do not have the internal roads listed on our map, please draw the dig site overly large and extend it to cover as much of the subdivision as possible mapping out to the main road it sets on. If you try and narrow down a smaller area, you are putting yourself at a greater risk of missing utilities. In any given situation, it is better to map an area larger than necessary than to map it too small and risk missing a utility.

- **Helpful Hints:**

- In counties with fewer subdivisions (like Brown County) you can leave the **Name field** blank and search for all subdivisions in the county.
- Be careful of your spelling. If you misspell a name, or omit any characters in the name, the subdivision may not be found.
- Always remember to check the 'T's' for subdivisions that may begin with the word 'The.'
- Always verify the mapping. This search is for the entire county, and our system may have more than one subdivision sharing the same name or similar names.
